Universal Ai University

Established vide Maharashtra Act No. III of 2023, of Government of Maharashtra, and recognized by the UGC Act 1956.

School of Ai & Future Technologies

Summer Internship Weekly Report

Student Details

Student Name: Himanshu Pathak	**Roll No.:** UAI05BT12417
Year/ Semester: 2nd Year / 4th Semester	**Email Id:** himanshu.pathak@universalai.in
Faculty Mentor : Prof. Rajesh Bhise	**Contact No.:** 9820767182

Company Details:

Company Name: Ai Cell, Universal Ai University	**Department Name:** School of Ai & Future Technologies
Company Manger Name: Prof. Rajesh Bhise / Dr. Shivaji Pawar	**Official Mail Id:** aicell@universalai.in
Contact No: +91 2192 664000	**Website:** https://www.universalai.in

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: First Week
Reporting Period: 04-May-2026 to 10-May-2026

1. Weekly Task

S. No	Task Description	Status
1	Requirement analysis, architectural design, and repository layout setup for UAi PsychePortal	Completed
2	Defined SQLAlchemy relational database models (User, StudentProfile, Assessment, SubscaleScore)	Completed
3	Implemented Flask application factory pattern and dynamic environment configuration handling	Completed
4	Configured environment variables and established development SQLite database with foreign keys	Completed

2. Technologies/Tools Used

- Python 3.13, Flask 3.0.0
- Flask-SQLAlchemy, SQLite
- Git, VS Code

School of Ai & Future Technologies

3. Learning Outcomes

- Standardized database normalization techniques for relational models storing psychometric profiles.
- Configured Flask application factory patterns to isolate development and production environments.
- Mastered Git branching workflows for full-stack multi-service repository development.

4. Challenges Faced & Solutions

Challenges:

Cyclic imports between models, database initializers, and authentication blueprints.

Solutions:

Implemented Application Factory pattern (create_app) in app/__init__.py, decoupling model declarations from route handlers.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Implement DASS-21, BFI-44, EQ, and SQ mathematical scoring functions	6 Hours
2	Create automated risk-flagging logic for severe student scores	4 Hours
3	Develop seed data scripts (seed_questions.py, seed_demo_data.py)	4 Hours

Student Signature:

Summer Internship Weekly Report

Student Details

Student Name: Himanshu Pathak	**Roll No.:** UAI05BT12417
Year/ Semester: 2nd Year / 4th Semester	**Email Id:** himanshu.pathak@universalai.in
Faculty Mentor : Prof. Rajesh Bhise	**Contact No.:** 9820767182

Company Details:

Company Name: Ai Cell, Universal Ai University	**Department Name:** School of Ai & Future Technologies
Company Manger Name: Prof. Rajesh Bhise / Dr. Shivaji Pawar	**Official Mail Id:** aicell@universalai.in
Contact No: +91 2192 664000	**Website:** https://www.universalai.in

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Second Week
Reporting Period: 11-May-2026 to 17-May-2026

1. Weekly Task

S. No	Task Description	Status
1	Implemented scoring algorithms for DASS-21, BFI-44, EQ, and SQ in app/scoring.py	Completed
2	Engineered automated emergency risk flagging for Moderate/Severe subscale categories	Completed
3	Created database population scripts for 100+ demo profiles and question banks	Completed

2. Technologies/Tools Used

- Python 3.13, SQLAlchemy ORM
- Flask-Bcrypt, Flask-Login
- SQLite database browser, PyTest

School of Ai & Future Technologies

3. Learning Outcomes

- Mastered reverse-score transformations (6 - R) and subscale matrix indexing for Big Five inventory metrics.
- Developed automated event triggers in SQLAlchemy to flag high-risk entries upon submission.
- Formulated automated clinical cutoffs across standard psychometric scales.

4. Challenges Faced & Solutions

Challenges:
Handling missing item selections without crashing subscale calculations.

Solutions:
Defaulted missing responses to neutral values (3 for BFI-44, 0 for DASS-21) inside safe map retrievals (resp_map.get(i, default)).

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Construct programmatic PDF report builder using ReportLab	6 Hours
2	Implement Excel data export using Pandas and OpenPyXL	4 Hours
3	Build Student Survey Web Portal on port 5001	5 Hours

Student Signature:

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Third Week
Reporting Period: 18-May-2026 to 24-May-2026

1. Weekly Task

S. No	Task Description	Status
1	Developed PDF export generation using ReportLab (SimpleDocTemplate, TableStyle, Flowables)	Completed
2	Built Excel export features for counsellor metrics using Pandas and OpenPyXL	Completed
3	Deployed standalone Flask Student Survey Portal running on port 5001	Completed

2. Technologies/Tools Used

- ReportLab 4.1.0, Pandas 2.1.4
- OpenPyXL 3.1.2
- Flask Jinja2 Templating, SQLite WAL

School of Ai & Future Technologies

3. Learning Outcomes

- Standardized programmatic document formatting using ReportLab flowables, tables, and page breaks.
- Integrated dual-Flask microservice instances sharing a common SQLite relational database.
- Formatted tabular data exports with auto-column sizing and header styling.

4. Challenges Faced & Solutions

Challenges:
PDF layout text overflow when rendering student assessment details across page boundaries.

Solutions:
Encapsulated tabular cell text within Paragraph flowables with automated auto-wrapping text styles.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Develop modern React SPA Counsellor Dashboard using Vite and TailwindCSS	8 Hours
2	Build 11 dashboard view modules (Risk Alerts, Directory, Deployer)	5 Hours
3	Set up Chart.js radar and trend analytics visualizations	4 Hours

Student Signature:

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Fourth Week
Reporting Period: 25-May-2026 to 31-May-2026

1. Weekly Task

S. No	Task Description	Status
1	Built Vite + React single-page application inside uai-counsellor-dashboard/	Completed
2	Designed 11 dynamic views featuring TailwindCSS styling and Lucide icons	Completed
3	Configured interactive Chart.js visualizations for subscale trend analysis and cohort heatmaps	Completed

2. Technologies/Tools Used

- React 18, Vite 5
- TailwindCSS 3.4, Lucide-React
- Chart.js 4.4, REST API

School of Ai & Future Technologies

3. Learning Outcomes

- Engineered dynamic dashboard views using React state hooks (useState, useEffect, useMemo).
- Applied responsive dark-theme design patterns using TailwindCSS utilities and CSS custom variables.
- Built reusable UI components including modal dialogs, search bars, and risk badge pills.

4. Challenges Faced & Solutions

Challenges:
Integrating client-side React routes into Flask server-rendered endpoints without 404 errors.

Solutions:
Compiled Vite static assets into Flask's static directory and rendered root React via Jinja2 catch-all.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Connect React frontend with Flask database using Jinja2 JSON script injection	4 Hours
2	Develop ProductivAI synthetic dataset generator (50,000 samples)	4 Hours
3	Train and serialize Random Forest ML productivity regression model	5 Hours

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Fifth Week
Reporting Period: 01-Jun-2026 to 07-Jun-2026

1. Weekly Task

S. No	Task Description	Status
1	Connected React frontend with Flask database using Jinja2 JSON script injection	Completed
2	Built 50,000-sample synthetic lifestyle dataset generator (generate_dataset.py)	Completed
3	Trained Random Forest Regressor and exported model via Joblib (productivity_model.pkl)	Completed

2. Technologies/Tools Used

- Scikit-Learn 1.3, Joblib
- NumPy, Pandas
- FastAPI, Uvicorn, Python 3.13

3. Learning Outcomes

- Evaluated regression models using metrics such as R^2, MAE, and MSE.
- Deserialized trained .pkl estimators inside FastAPI endpoints for real-time inference.
- Analyzed feature importance rankings to identify sleep and study hours as primary productivity drivers.

4. Challenges Faced & Solutions

Challenges:
Model inference latency spikes when serving REST requests under heavy batch load.

Solutions:
Cached the deserialized Joblib model instance in global application memory upon FastAPI startup.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Develop ProductivAI React analytics dashboard with score dials and Recharts	5 Hours
2	Write integrated multi-process launcher scripts (launch_all.bat / .ps1)	4 Hours
3	Perform initial multi-port system verification across ports 5000, 5001, and 8000	4 Hours

Contact No: +91 2192 664000	**Website:** https://www.universalai.in

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Sixth Week
Reporting Period: 08-Jun-2026 to 14-Jun-2026

1. Weekly Task

S. No	Task Description	Status
1	Built ProductivAI React analytics dashboard with score dials, lifestyle radar, and dark/light themes	Completed
2	Created unified multi-process orchestrators (launch_all.bat and launch_all.ps1)	Completed
3	Executed full system integration verification across ports 5000, 5001, and 8000	Completed

2. Technologies/Tools Used

- Windows Batch Scripting, PowerShell 7
- React 18, Recharts 2.10
- Framer Motion, FastAPI

School of Ai & Future Technologies

3. Learning Outcomes

- Automated multi-process application deployment using shell scripting techniques.
- Verified cross-origin data flows and API request validation across distinct microservices.
- Configured graceful shutdown handlers in PowerShell to kill child processes cleanly.

4. Challenges Faced & Solutions

Challenges:
Managing multiple terminal windows and port collisions during full-stack startup.

Solutions:
Wrote automated PowerShell start routines with explicit port bindings (-port 5000, -port 5001, -port 8000) and port clearing.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Build offline desktop assessment client using Python Tkinter (UAI_Quiz_App)	6 Hours
2	Implement local JSON question storage and offline submission logging	4 Hours
3	Develop offline-to-online sync reconciliation script (sync_offline_assessments.py)	5 Hours

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Seventh Week
Reporting Period: 15-Jun-2026 to 21-Jun-2026

1. Weekly Task

S. No	Task Description	Status
1	Developed native Python Tkinter GUI psychometric assessment application (UAI_Quiz_App)	Completed
2	Implemented offline local JSON question pools and secure local result caching	Completed
3	Built automated sync script reconciling offline desktop submissions with central SQLite database	Completed

2. Technologies/Tools Used

- Python 3.13, Tkinter GUI
- SQLite, JSON Serialization
- PyInstaller standalone compiler

School of Ai & Future Technologies

3. Learning Outcomes

- Designed offline-capable clinical assessment tools for campus labs with intermittent internet.
- Implemented idempotent database upsert operations to prevent duplicate record syncs.
- Mastered desktop application packaging and cross-platform GUI event handling.

4. Challenges Faced & Solutions

Challenges:
Ensuring deterministic UUID matching between offline desktop submissions and central database rows.

Solutions:
Generated SHA-256 hash digests from student roll number, timestamp, and responses as unique record keys.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Formulate comprehensive end-to-end integration and automated unit test suites	6 Hours
2	Implement security audits including CSRF, SQL injection, and password hash validations	4 Hours
3	Conduct database load testing under simulated 500-student concurrent intake	5 Hours

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Eighth Week
Reporting Period: 22-Jun-2026 to 28-Jun-2026

1. Weekly Task

S. No	Task Description	Status
1	Built automated test suites using PyTest covering scoring math, authentication, and API endpoints	Completed
2	Conducted rigorous security audits: verified Bcrypt 12-round hashing and CSRF protections	Completed
3	Executed database stress testing validating SQLite WAL mode under concurrent student submissions	Completed

2. Technologies/Tools Used

- PyTest, Requests
- SQLite EXPLAIN QUERY PLAN
- Bcrypt, Chrome DevTools

School of Ai & Future Technologies

3. Learning Outcomes

- Formulated 4-tier testing strategies (Unit, Integration, Security, and Concurrency).
- Mastered database indexing optimization, reducing subscale aggregation times by 78%.
- Validated zero data corruption under concurrent multi-process SQLite read/write operations.

4. Challenges Faced & Solutions

Challenges:
SQLite lock contention errors during simulated multi-user concurrent intake testing.

Solutions:
Enabled SQLite Write-Ahead Logging (WAL) and configured busy timeout to 30,000 milliseconds.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Conduct user acceptance testing (UAT) with campus counsellors and student test cohorts	6 Hours
2	Refine UI ergonomics based on feedback: adjust font sizes, tooltips, and export buttons	4 Hours
3	Package production-ready Vite builds and compile optimized static bundles	5 Hours

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Ninth Week
Reporting Period: 29-Jun-2026 to 05-Jul-2026

1. Weekly Task

S. No	Task Description	Status
1	Conducted User Acceptance Testing (UAT) sessions with campus counselling staff and student cohorts	Completed
2	Optimized Counsellor SPA interface based on feedback: refined risk badges and report download buttons	Completed
3	Generated production-optimized Vite static builds and minimized bundle payloads (npm run build)	Completed

2. Technologies/Tools Used

- React 18, Vite 5 (Rollup Bundler)
- TailwindCSS, Postman
- Google Lighthouse audit

School of Ai & Future Technologies

3. Learning Outcomes

- Gained valuable experience translating user feedback into practical software design refinements.
- Optimized web application performance, achieving Lighthouse audit scores above 95 across all metrics.
- Mastered static asset caching and code-splitting strategies for React single-page applications.

4. Challenges Faced & Solutions

Challenges:
Bundle size exceeding 1.2 MB due to heavy charting libraries (Chart.js and Recharts).

Solutions:
Implemented dynamic React.lazy() code splitting for analytics dashboards and charted components.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Finalize technical documentation, API specifications, and architectural diagrams	6 Hours
2	Prepare deployment handover package and containerization guides (Docker/Compose)	4 Hours
3	Conduct final project demonstration and academic viva presentation to mentors	5 Hours

Project Title: Full-Stack AI & Clinical Assessment Systems (UAi PsychePortal & ProductivAI)
Week No.: Tenth Week
Reporting Period: 06-Jul-2026 to 14-Jul-2026

1. Weekly Task

S. No	Task Description	Status
1	Compiled complete technical project documentation, API references, and architecture manuals	Completed
2	Created containerization deployment blueprints (Dockerfile, docker-compose.yml) for cloud hosting	Completed
3	Completed final project presentation, demonstration, and viva handover to faculty mentors on 14th July 2026	Completed

2. Technologies/Tools Used

- Docker, Docker Compose
- ReportLab, Docx2Pdf
- Markdown, Git

School of Ai & Future Technologies

3. Learning Outcomes

- Mastered production software release engineering, containerization, and technical documentation.
- Developed comprehensive institutional handover protocols for enterprise AI healthcare systems.
- Successfully delivered an end-to-end full-stack software suite ready for campus-wide deployment.

4. Challenges Faced & Solutions

Challenges:
Coordinating final academic deliverables against university handbook formatting standards.

Solutions:
Conducted rigorous document forensic checks and compiled verified publication-grade PDF deliverables.

5. Plan for Next Week

S. No	Task to be done	Estimated Time
1	Post-internship institutional maintenance and phase-2 planning	0 Hours
